

## (Doctor Go)

### Problem statement:

#### 1. Difficulty in Finding Qualified Healthcare Providers

Patients often struggle to find reliable information about doctors, including their specialties, availability, and reputation.

#### 2. Inefficient Appointment Scheduling

Traditional methods of booking appointments can be time-consuming, requiring multiple phone calls

#### 3. Limited Access to Healthcare in Remote Areas

People living in remote or underserved areas may have limited access to healthcare facilities and professionals.

### Solutions:

#### 1. Difficulty in Finding Qualified Healthcare Providers

Solution: provide a directory of healthcare providers, allowing patients to search for doctors by specialty, read reviews, and view ratings from other patients.

#### 2. Inefficient Appointment Scheduling

Solution: offers an online booking system that allows patients to schedule appointments with their preferred doctors

The platform provides real-time availability, reducing the likelihood of scheduling issues.

#### 3. Limited Access to Healthcare in Remote Areas

Solution: teleconsultation services enable patients to consult with doctors online, bridging the gap for those who cannot easily access in-person healthcare services.

# Objectives:

Doctor Go is a digital platform that connects patients with healthcare providers. It aims to:

- Enhance Accessibility to Healthcare:

Make it easier for patients to find and book appointments with qualified healthcare professionals, regardless of location.

- Improve Patient Experience:

Simplify the process of managing healthcare needs, including scheduling appointments, accessing teleconsultations,

- Promote Transparency in Healthcare:

Offer detailed information about doctors, including their specialties, patient reviews, and consultation fees, helping patients make informed decisions.

- Support Healthcare Providers:

Assist doctors and clinics in managing their practice more efficiently by offering tools for appointment scheduling, patient management, and digital consultation.

Overall, Doctor GO objective is to leverage technology to create a more connected, transparent, and efficient healthcare ecosystem, improving outcomes for both patients and healthcare providers.
